Introduction

Mental health continues to be one of the most significant global health problems we face, affecting approximately 450 million people worldwide (World Health Organization, 2017). Mental disorders have a significant detrimental effect on quality of life, accounting for 13% of disability-adjusted life years and 32.4% of years lived with disability globally (Vigo, Thornicroft, & Atun, 2016). Additionally, mental illness can have substantial economic consequences. Mental disorders cost US$2.5 trillion globally, and economic output loss due to mental disorders is anticipated to be US$16.3 trillion worldwide between 2011 and 2030 (Trautmann, Rehm, & Wittchen, 2016). Effective treatments exist for mental illness, however many of those affected do not have access.

According to Professor Shekhar Saxena of Harvard T.H. Chan School of Public Health, no countries are developed when it comes to mental health (Davies, 2018). Approximately 35-50% of those affected by mental disorders do not receive treatment in high-income countries (Saxena, Thornicroft, Knapp, & Whiteford, 2007). Worse still, in middle and low-income countries, 76-85% of affected individuals do not receive treatment (Saxena, Thornicroft, Knapp, & Whiteford, 2007). Key barriers to accessing effective treatment include a shortage in supply of trained mental health workers relative to demand for services, and low funding for treatment and prevention (Rathod et al., 2017). One way to increase the supply of mental healthcare is through technology.

Language technology may be particularly well-suited to improve supply of mental health services. Conversations are a fundamental part of the diagnostic and therapeutic process for mental health. This is because language provides crucial insights into a patient’s symptoms, thoughts, feelings, and functioning (Pennebaker, Mehl, & Niederhoffer, 2003). Given the advent of the internet and personal electronic devices, linguistic data is readily available, and can be found in and outside of treatment contexts in text and oral form. Applying language technology to mental healthcare can open the door to creating scalable, inexpensive screening measures or risk assessments that may be administered by a wider variety of healthcare professionals in a broad range of contexts. Additionally, conversational agents can assist with the provision of therapy exercises or emotional support beyond treatment settings (Fitzpatrick, Darcy, & Vierhile, 2017). Public social media posts have been used to infer a community’s mental health following crisis events (Kumar, Dredze, Coppersmith, & De Choudhury, 2015), and triage tools have been used to present messages to online support workers by order of crisis severity (Milne, Pink, Hachey, & Calvo, 2016). Evidently, language technology shows incredible promise for increasing the supply of quality mental health support services, and further research and development efforts are needed. While at the same time, remaining cognizant of ethical issues that may arise in the process (Benton et al., 2017; Chancellor et al., 2019).

The Computational Linguistics and Clinical Psychology (CLPsych) workshop series aims to support and accelerate the development of language technology for mental healthcare. CLPsych brings together computational linguists and mental health clinicians to discuss and develop tools and data that can support clinicians, service organizations, and/or individuals with lived experience of mental disorders. Given its multidisciplinary community, CLPsych values clear communication of relevant computational methods and results, and all presentations are followed by clinical commentary.

CLPsych has been held annually at the meeting of the Association of Computational Linguistics (ACL) or the North American Association of Computational Linguistics (NAACL) since 2014. During this time, CLPsych has helped to define the start of the art in language technology for mental health, introduced a clinically-oriented workshop structure to the ACL community, and established a shared task tradition in which participants work on common datasets and tasks to develop systems or techniques that aid in the detection of mental disorders. Prior shared tasks have involved working with data from ReachOut.com and the UK Data Service.
The Sixth Workshop on Computational Linguistics and Clinical Psychology (CLPsych 2019) was held at the North American Association for Computational Linguistics and Human Language Technology’s (NAACL-HLT) annual meeting in Minneapolis, MN on June 6th. The focus of 2019’s workshop was reconciling outcomes, with the goal of fostering discussions on the outcomes that are most important to pursue as a community. Continuing CLPsych’s traditional interdisciplinary approach, practicing clinicians and clinical researchers were included as part of our program committee, and were invited to submit papers and serve as discussants of presented work.

The workshop also included a keynote talk by Becky Inkster, a UK neuroscientist active in digital innovation for mental health, as well as a technologist/clinician panel discussion including Nick Allen (University of Oregon), Glen Coppersmith (Qntfy), Nazli Goharian (Georgetown University), and Michelle Kuchuk (National Suicide Prevention Lifeline).

2019’s workshop had two submission formats: full papers and position papers. Overall, 17 submissions were received. Accepted submissions included 11 full papers and 2 position papers, which were presented as 6 talks and 7 posters.

A shared task was held that focused on predicting individuals’ suicide risk from de-identified, public Reddit data. Teams could participate in three tasks. Task A involved predicting level of risk for users posting to the r/SuicideWatch subreddit based on their SuicideWatch posts. Task B involved the same risk assessment, but with additional access to all the users’ posts elsewhere on Reddit. Task C involved a screening/monitoring scenario in which user risk was assessed based only on their Reddit posts excluding SuicideWatch or other mental health forums. A total of 83 entries were provided by 15 teams who participated in at least one task each. Accepted shared task paper submissions were presented as an additional 9 posters and 2 full talks at the workshop. 2019’s shared task was organized by Ayah Zirikly, Philip Resnik, Özlem Uzuner, and Kristy Hollingshead.

The organizers wish to thank all who contributed to the success of CLPsych 2019. This includes authors and shared task participants for their insightful contributions, Program Committee members for their thoughtful reviews, our keynote speaker, panelists, and clinical discussants for their valuable insights, and shared task organizers for putting together a series of challenging exercises with important applications. The organizers also wish to thank the generous workshop sponsors, Amazon and the University of Maryland Center for Health-Related Informatics and Bioimaging (CHIB), as well as the North American chapter of the Association for Computational Linguistics, for making this workshop possible.

Kate Niederhoffer, Kristy Hollingshead, Philip Resnik, Rebecca Resnik, & Kate Loveys
Organizing Committee

Kate Niederhoffer, 7 Cups
Kristy Hollingshead, IHMC
Philip Resnik, University of Maryland
Rebecca Resnik, Rebecca Resnik and Associates, LLC
Kate Loveys, University of Auckland School of Medicine

Shared Task Organizers:

Ayah Zirikly, NIH
Philip Resnik, University of Maryland
Özlem Uzuner, George Mason University
Kristy Hollingshead, IHMC

Keynote Speaker:

Becky Inkster, University of Cambridge

Panelists:

Nick Allen, University of Oregon
Glen Coppersmith, Qntfy
Nazli Goharian, Georgetown University
Michelle Kuchuk, National Suicide Prevention Lifeline

Program Committee:

Nazli Goharian, Georgetown University
H. Andrew Schwartz, Stony Brook University
Glen Coppersmith, Qntfy
Ayah Zirikly, NIH
Cindy Chung, 7 Cups
Adam Miner, Stanford University
Frank Rudzicz, University of Toronto
Nick Allen, University of Oregon
Steven Bedrick, Oregon Health & Science University
Mike Conway, University of Utah
Danielle Mowery, University of Pennsylvania
Eric Morley, Google
Sean Murphy, Small Data Consulting, LLC
Daniel Preotiuc-Pietro, Bloomberg
Mark Rosenstein, Pearson Knowledge Technologies
Masoud Rouhizadeh, Johns Hopkins University
Maarten Sap, University of Washington
J. Ignacio Serrano, Spanish National Research Council (CSIC)
Matthew Purver, Queen Mary University of London
Shervin Malmasi, Harvard Medical School
Molly Ireland, Texas Tech University
Craig Pfeifer, Mitre
Table of Contents

Towards augmenting crisis counselor training by improving message retrieval
Orianna Demasi, Marti A. Hearst and Benjamin Recht .................................................. 1

Identifying therapist conversational actions across diverse psychotherapeutic approaches
Fei-Tzin Lee, Derrick Hull, Jacob Levine, Bonnie Ray and Kathy McKeown ................. 12

CLPsych 2019 Shared Task: Predicting the Degree of Suicide Risk in Reddit Posts
Ayah Zirikly, Philip Resnik, Ozlem Uzuner and Kristy Hollingshead ............................ 24

CLaC at CLPsych 2019: Fusion of Neural Features and Predicted Class Probabilities for Suicide Risk Assessment Based on Online Posts
Elham Mohammadi, Hessam Amini and Leila Kosseim .............................................. 34

Suicide Risk Assessment with Multi-level Dual-Context Language and BERT
Matthew Matero, Akash Idnani, Youngseo Son, Sal Giorgi, Huy Vu, Mohammad Zamani, Parth Limbachiya, Sharath Chandra Guntuku and H. Andrew Schwartz ....................... 39

Using natural conversations to classify autism with limited data: Age matters
Michael Hauser, Evangelos Sariyanidi, Birkan Tunc, Casey Zampella, Edward Brodkin, Robert Schultz and Julia Parish-Morris ................................................................. 45

The importance of sharing patient-generated clinical speech and language data
Kathleen C. Fraser, Nicklas Linz, Hali Lindsay and Alexandra Konig ............................ 55

Depressed Individuals Use Negative Self-Focused Language When Recalling Recent Interactions with Close Romantic Partners but Not Family or Friends
Taline Nalabandian and Molly Ireland ............................................................................. 62

Linguistic Analysis of Schizophrenia in Reddit Posts
Jonathan Zomick, Sarah Ita Levitan and Mark Serper .................................................... 74

Semantic Characteristics of Schizophrenic Speech
Kfir Bar, Vered Zilberstein, Ido Ziv, Heli Baram, Nachum Dershowitz, Samuel Itzikowitz and Eiran Vadim Harel ............................................................................................................. 84

Computational Linguistics for Enhancing Scientific Reproducibility and Reducing Healthcare Inequities
Julia Parish-Morris ........................................................................................................ 94

Temporal Analysis of the Semantic Verbal Fluency Task in Persons with Subjective and Mild Cognitive Impairment
Nicklas Linz, Kristina Lundholm Fors, Hali Lindsay, Marie Eckerström, Jan Alexandersson and Dimitrios Kokkinakis ................................................................. 103

Mental Health Surveillance over Social Media with Digital Cohorts
Silvio Amir, Mark Dredze and John W. Ayers .............................................................. 114

Reviving a psychometric measure: Classification and prediction of the Operant Motive Test
Dirk Johannßen, Chris Biemann and David Scheffer .................................................... 121

Coherence models in schizophrenia
Sandra Just, Erik Haegert, Nora Kofánová, Anna-Lena Bröcker, Ivan Nenchev, Jakob Funcke, Christiane Montag and Manfred Stede .................................................. 126
Overcoming the bottleneck in traditional assessments of verbal memory: Modeling human ratings and classifying clinical group membership
Chelsea Chandler, Peter W. Foltz, Jian Cheng, Jared C. Bernstein, Elizabeth P. Rosenfeld, Alex S. Cohen, Terje B. Holmlund and Brita Elvevag .................................................................137

Analyzing the use of existing systems for the CLPsych 2019 Shared Task
Alejandro González Hevia, Rebeca Cerezo Menéndez and Daniel Gayo-Avello .................148

Similar Minds Post Alike: Assessment of Suicide Risk Using a Hybrid Model
Lushi Chen, Abeer Aldayel, Nikolay Bogoychev and Tao Gong .................................152

Predicting Suicide Risk from Online Postings in Reddit The UGent-IDLab submission to the CLPysch 2019 Shared Task A
Semere Kiros Bitew, Giannis Bekoulis, Johannes Deleu, Lucas Sterckx, Klim Zaporojets, Thomas Demeester and Chris Develder .................................................................158

CLPysch2019 Shared Task: Predicting Suicide Risk Level from Reddit Posts on Multiple Forums
Victor Ruiz, Lingyun Shi, Wei Quan, Neal Ryan, Candice Biernesser, David Brent and Rich Tsui 162

Suicide Risk Assessment on Social Media: USI-UPF at the CLPysch 2019 Shared Task
Esteban Rissola, Diana Ramírez-Cifuentes, Ana Freire and Fabio Crestani .......................167

Using Contextual Representations for Suicide Risk Assessment from Internet Forums
Ashwin Karthik Ambalavanan, Pranjali Dileep Jagtap, Soumya Adhya and Murthy Devarakonda 172

An Investigation of Deep Learning Systems for Suicide Risk Assessment
Michelle Morales, Prajjalita Dey, Thomas Theisen, Daniel Belitz and Natalia Chernova ....177

ConvSent at CLPsych 2019 Task A: Using Post-level Sentiment Features for Suicide Risk Prediction on Reddit
Kristen Allen, Shrey Bagroy, Alex Davis and Tamar Krishnamurti .............................182

Dictionaries and Decision Trees for the 2019 CLPsych Shared Task
Micah Iserman, Taleen Nalabandian and Molly Ireland .............................................188
Conference Program

Thursday June 6, 2019

9:00–9:15  Opening Remarks

9:15–10:30  Workshop Session I: Presentations with Discussant Commentary

Towards augmenting crisis counselor training by improving message retrieval
Orianna Demasi, Marti A. Hearst and Benjamin Recht

Identifying therapist conversational actions across diverse psychotherapeutic approaches
Fei-Tzin Lee, Derrick Hull, Jacob Levine, Bonnie Ray and Kathy McKeown

10:30–10:45  Break

10:45–11:45  Keynote Speaker and Discussion: Becky Inkster

11:45–12:45  Workshop Session II: Shared Task Presentations with Discussant Commentary

CLPsych 2019 Shared Task: Predicting the Degree of Suicide Risk in Reddit Posts
Ayah Zirikly, Philip Resnik, Ozlem Uzuner and Kristy Hollingshead

CLaC at CLPsych 2019: Fusion of Neural Features and Predicted Class Probabilities for Suicide Risk Assessment Based on Online Posts
Elham Mohammadi, Hessam Amini and Leila Kosseim

Suicide Risk Assessment with Multi-level Dual-Context Language and BERT
Matthew Matero, Akash Idnani, Youngseo Son, Sal Giorgi, Huy Vu, Mohammad Zamani, Parth Limbachiya, Sharath Chandra Guntuku and H. Andrew Schwartz

12:45–1:45  Lunch and Poster Session

1:45–2:45  Workshop Session III: Presentations with Discussant Commentary
Thursday June 6, 2019 (continued)

*Using natural conversations to classify autism with limited data: Age matters*
Michael Hauser, Evangelos Sariyanidi, Birkan Tunc, Casey Zampella, Edward Brodkin, Robert Schultz and Julia Parish-Morris

*The importance of sharing patient-generated clinical speech and language data*
Kathleen C. Fraser, Nicklas Linz, Hali Lindsay and Alexandra Konig

2:45–3:45 **Workshop Session IV: Presentations with Discussant Commentary**

*Depressed Individuals Use Negative Self-Focused Language When Recalling Recent Interactions with Close Romantic Partners but Not Family or Friends*
Taleen Nalabandian and Molly Ireland

*Linguistic Analysis of Schizophrenia in Reddit Posts*
Jonathan Zomick, Sarah Ita Levitan and Mark Serper

3:45–4:00 **Break**

4:00–5:00 **Panel**

5:00–6:00 **Happy Hour and Posters**

*Semantic Characteristics of Schizophrenic Speech*
Kfir Bar, Vered Zilberstein, Ido Ziv, Heli Baram, Nachum Dershowitz, Samuel Itzikowitz and Eiran Vadim Harel

*Computational Linguistics for Enhancing Scientific Reproducibility and Reducing Healthcare Inequities*
Julia Parish-Morris

*Temporal Analysis of the Semantic Verbal Fluency Task in Persons with Subjective and Mild Cognitive Impairment*
Nicklas Linz, Kristina Lundholm Fors, Hali Lindsay, Marie Eckerström, Jan Alexandersson and Dimitrios Kokkinakis

*Mental Health Surveillance over Social Media with Digital Cohorts*
Silvio Amir, Mark Dredze and John W. Ayers
Reviving a psychometric measure: Classification and prediction of the Operant Motive Test
Dirk Johannßen, Chris Biemann and David Scheffer

Coherence models in schizophrenia
Sandra Just, Erik Haegert, Nora Kořánová, Anna-Lena Bröcker, Ivan Nenchev, Jakob Funcke, Christiane Montag and Manfred Stede

Overcoming the bottleneck in traditional assessments of verbal memory: Modeling human ratings and classifying clinical group membership
Chelsea Chandler, Peter W. Foltz, Jian Cheng, Jared C. Bernstein, Elizabeth P. Rosenfeld, Alex S. Cohen, Terje B. Holmlund and Brita Elvevag

Analyzing the use of existing systems for the CLPsych 2019 Shared Task
Alejandro González Hevia, Rebeca Cerezo Menéndez and Daniel Gayo-Avello

Similar Minds Post Alike: Assessment of Suicide Risk Using a Hybrid Model
Lushi Chen, Abeer Aldayel, Nikolay Bogoychev and Tao Gong

Predicting Suicide Risk from Online Postings in Reddit The UGent-IDLab submission to the CLPsych 2019 Shared Task A
Semere Kiros Bitew, Giannis Bekoulis, Johannes Deleu, Lucas Sterckx, Klim Zaporojets, Thomas Deemeester and Chris Develder

CLPsych2019 Shared Task: Predicting Suicide Risk Level from Reddit Posts on Multiple Forums
Victor Ruiz, Lingyun Shi, Wei Quan, Neal Ryan, Candice Biernesser, David Brent and Rich Tsui

Suicide Risk Assessment on Social Media: USI-UPF at the CLPsych 2019 Shared Task
Esteban Rissola, Diana Ramírez-Cifuentes, Ana Freire and Fabio Crestani

Using Contextual Representations for Suicide Risk Assessment from Internet Forums
Ashwin Karthik Ambalavanan, Pranjali Dileep Jagtap, Soumya Adhya and Murthy Devarakonda

An Investigation of Deep Learning Systems for Suicide Risk Assessment
Michelle Morales, Prajnalita Dey, Thomas Theisen, Daniel Belitz and Natalia Chernova

ConvSent at CLPsych 2019 Task A: Using Post-level Sentiment Features for Suicide Risk Prediction on Reddit
Kristen Allen, Shrey Bagroy, Alex Davis and Tamar Krishnamurti

Dictionaries and Decision Trees for the 2019 CLPsych Shared Task
Micah Iserman, Taleen Nalabandian and Molly Ireland
